Privacy Policy for reBOOK

Last updated: 2026-03-07

1. Introduction

This Privacy Policy explains how the macOS application **reBOOK** handles information when you use the app. reBOOK is developed and distributed by **Ricardo Mantero Vázquez – One Geek Army**. The application is designed to process EPUB files locally on your Mac and does not collect personal data from users.

2. Data Collection

reBOOK **does not collect, store, transmit, or share personal data** about users. The application: • Does not require user accounts • Does not track usage • Does not include analytics frameworks • Does not collect device identifiers • Does not store personal information

3. Local File Processing

reBOOK processes EPUB files that the user explicitly provides (for example via drag and drop or file selection). All file processing occurs **locally on the user's computer**. The application does not upload EPUB files, metadata, or covers to any server controlled by the developer.

4. Internet Requests

The application may perform optional online requests to retrieve book metadata and cover images from public book databases, such as: • Google Books API • Open Library API These requests are made only to retrieve public book information related to the title being searched. No personal data is transmitted as part of these requests.

5. Data Storage

reBOOK may store limited application preferences locally on the user's device using macOS standard system storage mechanisms (such as UserDefaults). These preferences may include items such as UI settings or rename templates. They remain on the user's computer and are not transmitted externally.

6. Third■Party Services

When metadata searches are performed, requests may be sent to third■party services (such as Google Books or Open Library). Those services operate under their own privacy policies. reBOOK does not control how those services process requests.

7. Data Security

Because reBOOK processes data locally and does not operate any servers, no user data is stored by the developer. All file modifications performed by the application occur on the user's device.

8. Children's Privacy

reBOOK is a general productivity tool and is not directed toward children. The application does not knowingly collect personal information from anyone, including children.

9. Changes to This Policy

This Privacy Policy may be updated from time to time. Updates will be reflected in a revised version of this document.

10. Contact

If you have questions regarding this Privacy Policy or the reBOOK application, you may contact: Ricardo Mantero Vázquez One Geek Army Email: one.geek.army@icloud.com
